## 2023 Insight Data for

### A. Quinn Jones Center

#### Index Scores

The Instructional Culture Index is a summary measure of a school's instructional culture. Schools with strong Index Scores generally have strong student outcomes and retain more of their most effective teachers. Your school's Index score and Index Percentile Rank are below.

School Index Score

**8.0**

Index Percentile Rank

**74%**

#### Domain Scores from the Teacher Survey

Questions in the Insight survey are grouped into topics called domains. Domain scores summarize your teachers' feedback about these topics. The blue bars show your school's domain scores and the green lines show the Alachua Top Quartile.

## Appendix

Explains the methodology used throughout this Insight Dashboard

### Index Scores

Index scores summarize teachers' agreement to three questions that, taken together, summarize a school's overall instructional culture—which matters for improving student outcomes and retaining effective teachers. Index scores are calculated based on the percentage of teachers who agree or strongly agree with the following statements and reported on a scale of 1-10:

- The expectations for effective teaching are clearly defined at my school.
- Teachers at my school share a common vision of what effective teaching looks like in practice.
- My school is committed to improving my instructional practice.

The Index Percentile Rank is based on a ranked order of school Index scores within Alachua County Schools, where 0% indicates the school with the lowest Index score and 100% indicates the school with the highest Index score.

### School Quartiles

Throughout this dashboard, you'll see comparisons to "Top Quartile Schools." These are schools with Index Scores in the top 25% of Alachua County Schools in the year selected. These schools' Index Scores suggest that they may be using best practices in instructional leadership. Mouse over the Instructional Culture Index chart on the Retention and Index tab to see your school's Index percentile.

### National Benchmarks

Throughout this dashboard, you'll see comparisons to National Average and National Top Quartile schools, which are calculated from our national dataset of over 2000 schools. The National Top Quartile is based on schools with Index Scores in the top 25% of our national database; these schools' Index Scores suggest that they may be using best practices in instructional leadership. National benchmarks may not be available for new survey questions.

### Domain Scores

Questions in the Insight survey are grouped into topics called domains. Domain scores summarize your teachers' feedback on these topics and are based on the average ratings of Likert items in that domain. When we report on individual questions, we usually share the percentage of respondents who agree or strongly agree. Because domain scores consider the full answer scale, they also capture the strength of agreement or disagreement with statements in that domain. We summarize the average ratings and then place the calculation on a 0–10 scale. For each domain, a score of 5 represents the national average for the domain. A score of 7 is one standard deviation above average; a score of 3 is one standard deviation below average.

### Survey Notes

- \*Survey items with an asterisk are not included in the domain score for that domain
- \*\*Survey items with a double asterisk are reverse-coded because for these items lower agreement is a better result
