

Student access to district resources

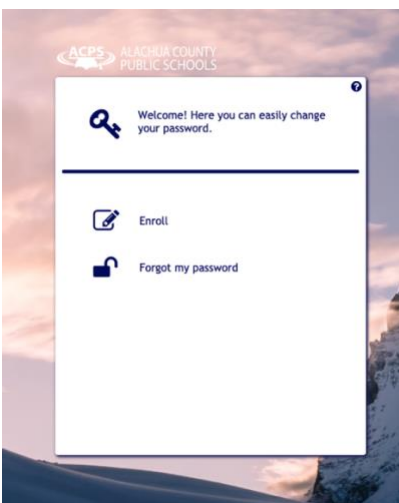

Make sure you have a valid username and password that gives you access to the [portal](#).

Student usernames consists of your first initial, middle initial and last name. If your name is John Raul Smith, for instance, your username would be jrsmith. If another student in the district has the same username, one of you will be assigned a number after the username. John Romero Smith, who registers after John Raul, will receive the username jrsmith1. If you are a student new to the district and don't know your username, try first initial, middle initial and last name.

*If you need to change your password, click on the link under "Sign in" that says "Password reset" or go directly to:

<http://reset.sbac.edu>

Select "Forgot my password" . Follow the screen instructions closely!

Examples of good passwords are:

Eastside#1 <-- has at least one capital letter (E), lower case letters, 8 characters of more, at least ONE number(1) and ONE symbol (#)

Mygirlfriendname#1 <-- You can use somebody else's name but NOT yours (no first, no middle, no last), and a symbol + at least a number

The best symbols seem to be !@#or ? Avoid using spaces in your password, as some services like Microsoft 365 seem to dislike it.

If this fails, please see Ms. Reedy in the front office, Ms. Scrivner in building 4 or Ms. Antony in the Media Center.
