Hundreds Chart

Use the Hundreds Chart to have your child count by 1's, 2's, 5's and 10's.

Have your child identify the pattern they see when Counting.

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20

Skip Counting to Identify Multiples

In lower grades, the hundreds chart is used to teach counting and patterns.

MULTIPLICATION CHART 1-12

12	12	24	36	48	60	72	84	96	108	120	132	144

In upper grades, it can help students identify multiples which aid in learning multiplication facts.

DICE Games

Dice Games are an easy way to get your student thinking about numbers.

Use the digits rolled to add, subtract, and multiply.

[25 Fun Math Games](#)

More and Less

Roll one die and write the number in the middle box. Fill in the numbers for 10 more, 10 less, 1 more, and 1 less.

Greater Than Less Than

Roll the dice and write in the the 2 numbers. Write in the correct sign in the circle: $<$ $>$ $=$

	○	
	○	

	○	
	○	

Developing Number Sense at Home

01

What's the Question? Give your child an answer and they have to ask the

02

question: I am an even number greater than ten but less than twenty. The sum of digits is nine. Who Am I?

03

Which number does not belong?

Which number does not belong :
4, 12, 17, 8, 20?

04

Which has more?
The number of wheels on two cars or the number of eggs in a dozen?

05

And the answer is.....
Student should compute a series of numbers in their head - the number of months in a year minus the number of days in a week.

Developing Number Sense

Problem Solving Strategy

C

Circle key numbers & units

What do I know?

U

Underline the question

What am I being asked to solve?

B

Box math clue words

Am I going to +, -, x, or \div ?

E

Evaluate and Eliminate

What steps do I take?

What information don't I need?

S

Solve and Show your work

Does my answer make sense?

How can I double check?

Fun STEM Activities

1

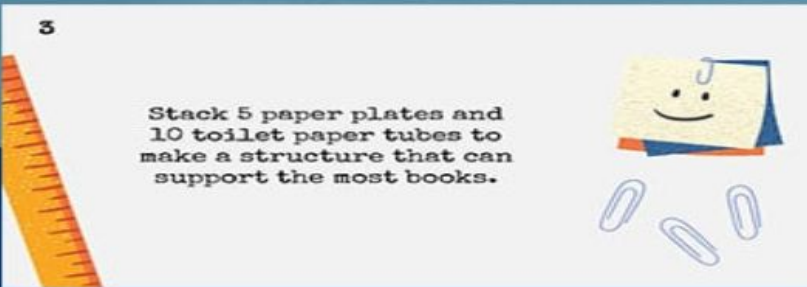

Use plastic straws, masking tape, and construction paper to make a raft with a sail.

2

Build the tallest tower you can with uncooked spaghetti and mini marshmallows.

3

Stack 5 paper plates and 10 toilet paper tubes to make a structure that can support the most books.

4

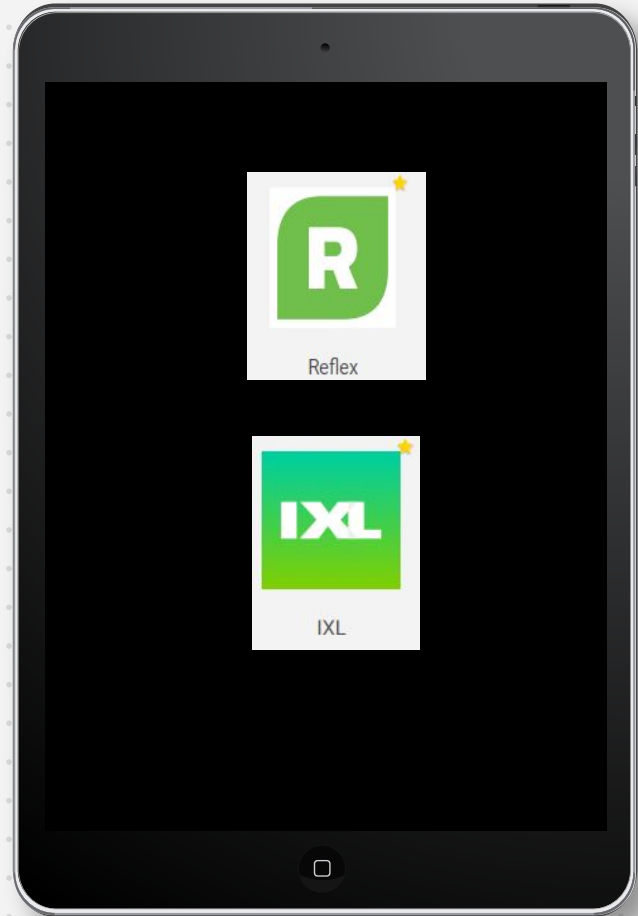

Use newspapers and masking tape to build a table that can hold a cup full of water.
