

Hosted faxes are:

- More secure. Confidential paper faxes can be left lying around for unauthorized people to see. Instead, the hosted fax system delivers faxes straight to your inbox where they can be printed, forwarded, archived, or discarded.
- Cost effective. Paper, equipment, dedicated phone lines maintenance, and toner are eliminated by using a hosted fax system.
- Convenient. A hosted fax system allows you to send or receive faxes from anywhere you have internet access.
- Easy to use. Simply upload your documents from your computer to a secure website. Faxes are received as email attachments.

If you have any questions about hosted fax or would like to get started with hosted fax, please call the helpdesk at [352-955-7500](tel:352-955-7500).
